

## Define the Problem: 20 Minutes (10 min each)

Who is the surprise for? Name the person.

Gather background information about the person who receives the surprise. What are they like? Where do they live? Age, gender, profession.

What is the motive? Why surprise this person?

What are things the person likes?

What are things the person dislikes?

What are the constraints of this surprise? For example distance, limited resources, limited time, other difficulties.

# Find Ideas, Give and Get Feedback, 30 Minutes

Who is the surprise for? Name the person.

10 Minutes, Produce 3-4 idea sketches

Room for your Ideas...

10 Minutes to present ideas and get feedback (per person)

Feedback:

# Iterate: Based on the Feedback, pick one idea to develop further, 5 Minutes

Room for notes and sketches....

# Implement and Test your Prototype (30 Minutes)

Implement a prototype (20 Minutes). Let your partner interact with / react to your prototype. Prompt your partner to think out loud or ask questions. Note down any ideas, reactions, feedback.

5 minutes each.

What is great about this idea?

What is problematic about this idea?

How can I make this better?

What are open questions?
